J2422**

WHY A METALFAB TOP MOUNT ENCLOSED PUMPER?

- Safely transport up to 4 additional firefighters in SCBA seats in cab
- Pump operator is positioned safely within the cab
- Abundant windows for visibility and additional interior lighting
- Speedlays located under seating area at a safe, easy to access height
- Speedlays available on dual direction sliding trays or removable trays
- Climate controlled cab for rehab applications
- Cab successfully passed roof intrusion test, side impact test, and seat belt anchorage test
- Rear facing outer side windows allow operator to view active on side of pumper
